NATURAL WINES

Natural wines is more of a concept than a well-defined category with agreed-upon characteristics. In its purest form, it is wine made from unadulterated fermented grape juice and nothing else. Some prefer phrases such as "low-intervention", or "naked wine or "raw" wine.

The winemaking process excludes the usage of pesticide or herbicide, would normally handpick their grape, use native yeast and won't use any additive. The presence of sulfite doesn't necessarily disqualify a bottle from the natural wine category but on very small amount (10-35 parts per million) is generally considered acceptable.
